6. What was good about the course? Which factors in particular supported your learning?

Number of respondents: 4

- I lot of inspiring inclass exercise.
- The teaching methods, the clarity of the speech. I liked that the teacher asked us to remind what we learned in the previous lessons, it helps a lot!  
The in-class exercises were also really useful.
- I really liked the Milos's way of teaching. It was the best-organized course I've ever had in my life. In the beginning I was kind of sceptical but he completely changed my mind and literally pulled me into the course. I liked also the assignment part, in class and also homework.
- The lectures were quite interesting and also the assignments made easy the application of the concepts in order to get the main ideas.

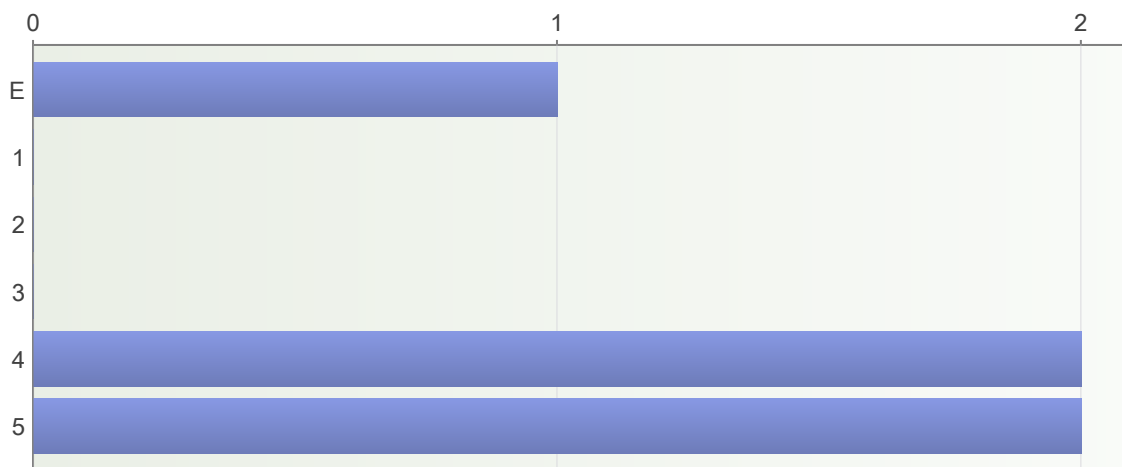

7. What needed improvement on the course? Which factors complicated your learning?

Number of respondents: 4

- The time of lecture is quite long
- The only little "problem" I can recall is that we knew just the day before the site visit at what time and where it would be. This is not really handy to organize our day.
- Maybe it would be helpful to get feedback for assignments what was wrong or not as good as it was supposed to be. Maybe it can be arranged in the way of the small comments in pdf files which will be posted back in mycourses as a feedback.
- I didn't have enough background to understand some ideas and I needed to dedicated more time. I wouldn't change any specific aspect about this course, I think it has a good structure and the homeworks are really useful

16. Did the course fulfill your learning expectations? Was there any topic that you would have preferred to be included or excluded?

Number of respondents: 3

- Yes.
- Partially yes, I was looking for something else but this was the closest one. But that is more my own concern
- Definitely the course fulfilled my expectations about it due to because I have learned many concepts about transportation planning.

17. Have you attended the lectures regularly? Please explain the reason(s) why, in either case.

Number of respondents: 4

- This course may have time clash with other course
- Yes, because it was interesting and we got points with the in-class exercises. I had another course at the same time both on tuesdays and thursdays but Urban Transport Systems was much more motivating!
- yes, it was really interesting and it was easy to pay attention! I've to admit that I've never experienced anything like this :)
- I attended all the lectures I could because it helped me to better follow the course.

18. Any other feedback to the transportation engineering teaching staff?

Number of respondents: 2

- Great
- It has been a really motivating course and I hope I'll continue learning about these issues.
